Summary

Proactive and reliable Computer Science student with a solid foundation in full-stack development, system debugging, and problem-solving. Strong experience with web technologies, REST APIs, and ML model deployment. Actively learning DevOps fundamentals including CI/CD, Linux, and system observability to grow into support engineering and system reliability roles.

Skills

- Programming Languages : C, Python, Java, Javascript
- Web Development : HTML, CSS, React
- Database Management : SQL, MongoDB
- Data Processing : Numpy, Pandas, EDA, Scikit-Learn
- DevOps & Tools: Git, GitHub Actions (CI/CD), Linux, Docker (learning), Postman
- Other : Problem Solving , File Handling, APIs, Web Services, Automation, Debugging

Education

B.Tech Jain(Deemed-to-be) University(Bengaluru),Computer Science   Aug 2023–Aug 2026
- CGPA:8.1/10.0

B.Tech Indus University(Ahemdabad),Computer Science   Aug 2022–Aug 2023

Seedling Modern Public School(Udaipur)   Aug 2020–Aug 2022
- 12th Grade:86.6%
- 10th Grade:86.2%

Experience

Corinzo, Marketing Intern   Feb 2024 – Mar 2024
    Bengaluru
- Conducted **market research** and implemented a **digital strategy**
- Collaborated on **promotional campaigns,** improving **communication** and **client interaction skills.**
- Gained hands-on **experience** with marketing **tools** and **real-world** campaign **execution**.

Projects

Real-Time Chat Application- Chatty
Stack: React.js, TailwindCSS, Node.js, Express.js, MongoDB, Socket.io, JWT, Google OAuth
- Built a real-time chat web app with **Socket.io** enabling instant messaging and live updates.
- Implemented **JWT** and Google **OAuth** authentication with secure **REST APIs** and **WebSocket** validation.
- Developed responsive UI using **React**.js, **TailwindCSS**, and integrated **MongoDB** for data storage.

AI SaaS Platform- Quick.Ai
Stack: React.js, Node.js, Express.js, PostgreSQL, Clerk Auth, OpenAI API, Replicate API, Tailwind CSS, REST APIs
- Built **AI SaaS** app with **Clerk auth**, **Stripe billing**, and protected routes using **PERN stack**.
- Integrated OpenAI & Replicate APIs for tools like article/image generation & resume analysis.
- Deployed with **Neon (serverless Postgres)** and styled responsive UI with Tailwind & React Router.

Diabetes Prediction
Stack: Flask, Scikit-learn, Pandas, HTML/CSS, AWS
- Built ML model pipelines using logistic regression and decision trees.
- Developed interactive frontend using Flask to serve prediction results.
- Deployed the complete application on AWS for scalable access and testing
